

# E-CQURITY

## MANAGE YOUR VULNERABILITY

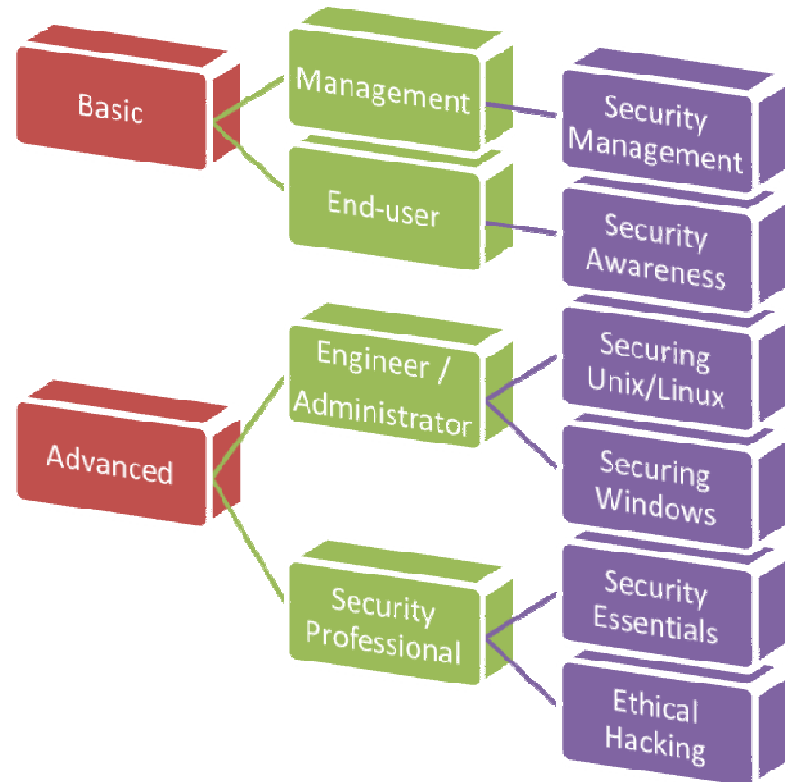

### Security Training

Each network infrastructure has different configuration with unique security needs and issues. E-CQURITY security training program can be specifically designed to suit your requirements. Taking part as **Advisor** and **Mentor** for **SANS/GIAC** and **Subject Matter Expert** of many different certifications, including the world renowned CompTIA Security+, E-CQURITY's experienced consultants will not just only help raise your knowledge and skills but also help you understand current security issues, protections, techniques, and technologies outside the book.

## Choose your path

- **Security Management** – quick course for the management to understand the threats and risks to information resources and identify generally accepted best practices
- **Security Awareness** – designed to train end-user on the appropriate use, protection, and security of information
- **Securing Unix/Linux** – suitable for those who are responsible for installing, configuring, and monitoring Unix or Linux systems
- **Securing Windows** – provide system administrators with the necessary knowledge and skills to secure and audit Windows systems
- **Security Essentials** – appropriate for hands on, technically oriented managers that want to understand information security beyond simple terminology and concepts
- **Ethical Hacking** – teach you how to use the same hacking techniques as real world hackers to perform penetration testing against your network
