## MANAGE YOUR VULNERABILITY

### VIA Agent

Vulnerability Identification & Alert (VIA) Agent is an intelligent automated and remote vulnerability assessment service provided by E-CQURITY to help address all your security concerns and needs.

VIA Agent is the fastest and easiest way to help you identify as well as eradicate vulnerabilities on your network. Requiring nothing more than just a web browser and Internet connection, you can easily assign VIA Agent to evaluate the security of your network as often as you want, at the schedule of your choice.

## Customer

Customers who subscribe to use VIA Agent service can conveniently schedule a scan anytime through the vulnerability management web portal. The connection between the customers and the web portal is completely secured with SSL 256-bit AES encryption.

## Web Portal

Powerful and flexible vulnerability management web portal allow customers to schedule a scan request, view scan results, configure alerts, and many other useful tasks. All scanning options and techniques are configurable through this user-friendly portal.

## Scan Targets

Through the portal, customers specify the scan target by its IP address or domain name. VIA Agent will perform regular assessment on the target according to the schedule. Scan targets provided must be rightfully owned and authorized.

## Threats Database

It is no surprised that VIA Agent is one of the most thorough and accurate remote vulnerability assessment services with over +23,000 vulnerability checks. New vulnerabilities or threats are updated regularly every 12-hour and directly fed into the database, ensuring our customers will always be alert with the latest security threats. Besides, our industry leading fuzzing engine helps uncover 0-day vulnerabilities from time to time to help alert and protect the users even from threats that are largely unknown to the industry.
